## COURSEWORK

### CERTIFICATES

- NPTEL's Programming in Java- ELITE
- React JS from coursera
- TOEFL ibt- 92/120
- DBMS- Infosys Springboard
- FrontEnd using Angular JS: Udemy

### GRADUATE

- Data Structures and Algorithms
- Object Oriented Programming
- Design and Analysis of Algorithm
- Database Management System

### CODING

- Solved **4000+** problem in SkillRack
- Solved **300+** problems in LeetCode, HackerRank and GFG
- Rank 1 and 2** in coding and Aptitude in SkillRack Portal

## SKILLS

### Languages:

C • C++ • Java • Javascript

• HTML • Tailwind CSS • Material UI

### Technologies:

• Angular JS • MySQL • Node JS • Swing

## AWARDS

- Finalist- Smart India Hackathon
- College rank 2- Coding Nijas Codekaze
- College rank 1- Newton's contest.
- Consolation prize- Innovative project
- Rank 3- St Joseph coding contest

## EXPERIENCE

### BEZZIETECH | REACT JS INTERN

Jun 2023 – July 2023 | Online

- Led the development of **admin panel** during my internship which showcased my ability to contribute to critical project components.
- Gained knowledge in **Next.js** and skills in managing large-scale projects with distributed teams. Effectively leveraged **GitHub for collaborative** development and project tracking and product development process.
- Gained practical experience in understanding and fulfilling client requirements within a **startup environment** contributing to project success.
- Tech stack: **React JS, Tailwind CSS**

### THE SPARKS FOUNDATION | FRONT END INTERN

Feb 2022 – Mar 2022 | Online

- Spearheaded the development of a dynamic low-latency front-end for a banking application which has user-friendly interface to enhance customer experience.
- Implemented a responsive web design strategy to ensure seamless access across various **devices and screen sizes**.
- integrated critical banking features, including account management, loan options, and operational hours, into the application's front-end.
- Tech stack: **HTML, CSS, JavaScript**

## PROJECTS

### CAFE MASTER | ANGULAR JS, NODE JS, MYSQL, EXPRESS JS

Sep 2023

- Designed a visually engaging **Cafe Management System**, incorporating **dynamic role-based access control** for admins and users for seamless order processing.
- Implemented advanced security measures, using **JWT authentication**, to ensure exclusive access to sensitive data. Used **Material UI** for a user-friendly interface.
- Skillfully integrated **intuitive search and filtering functionalities**, empowering cafe staff in managing products efficiently and with a vast product inventory, helping users to effortlessly **explore and discover products** aligning with their preferences.

### VIRTUCART | REACT JS, TAILWIND CSS

May 2022

- Designed and developed a feature-rich **Online shopping website** using Angular JS, enabling users to seamlessly browse **product catalogs, manage shopping carts**, and access pricing information where design is taken from flipkart product design.
- Used local storage to enhance user experience and data persistence. Utilized Tailwind CSS to create a visually appealing user interface, ensuring a polished and responsive design for the online shopping platform.

### ARTICLE HUB | ANGULAR JS, NODE JS, MYSQL, EXPRESS JS

Nov 2023

- Developed a robust **Article Blog Application** that facilitated seamless content management. Implemented user and admin access, ensuring **tailored functionalities for roles**. Integrated **JWT** for advanced security, guaranteeing secure access.
- Skillfully integrated **intuitive search and filtering functionalities**, enabling users to effortlessly discover articles aligning with their preferences. Used **MaterialUI** for enhanced user experience.
